The screenshot shows a REST client interface with a POST request to `https://dialogflow.googleapis.com/v2beta1/projects/pt-bot-d56dd/agent/sessions/34563:detectIntent`. The request body is a JSON object with a `queryInput` field containing a `text` object with `text` and `languageCode` properties. The response status is 200 OK, with a time of 1808 ms and a size of 723.57 KB. The response body is a JSON object containing a `responseId`, a `queryResult` object with `queryText` and `parameters` (including `AreasToTrain`), and `fulfillmentText` and `fulfillmentMessages` arrays.

I found it wasn't recognising entities properly, e.g. when saying "Let's do abs" it would return a legs workout for some reason. So, I created separate entities for arms/back/chest/core/legs instead of a single entity and now it works.
